

## InfoPort

Reports you want, the way you want them,  
available to view plan data.

InfoPort<sup>SM</sup> is UMR's online transactional data reporting tool. It provides users with an option to create, customize and schedule reports or run a report on demand. InfoPort supports a variety of flexible data options and offers a broad range of online reports that are accessible via a secure, password-protected portal.

### The intuitive online reporting tool enables users with report access to view information on:

- Paid claims
- Incurred but not reported (IBNR) activity
- Benefit utilization
- Financial activities
- Plan costs
- Network performance
- Enrollment

(Continued)

## Report data

### Claim payment reports

Claim Comparison  
Claim Detail  
Claim Distribution  
Claim Lag  
Claim Summary  
Claim Summary by Member  
Claim Summary by Network  
Claim Summary by Provider  
Claim Summary Service Level  
Claims & Enrollment by Month  
Top Claimants Report  
Admission Summary  
Adult Screening  
Adult Wellness Exam  
Incurred But Not Reported (IBNR)  
Plan Cost Summary

### Enrollment reports

Enrollment Census  
Enrollment Summary  
Enrollment Summary by Month

### Extract reports

Claim Level  
Claim Service Level  
Enrollment Census

### Additional reports

(if data is available)  
Rx Summary  
Rx Extract  
Health Reimbursement  
Arrangement (HRA) Utilization  
- Detail and Summary  
Stop Loss Pre-Generated Reports

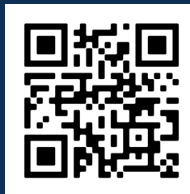

## InfoPort users have the options to:

- Access various report designs with multiple report layouts
- Create a variety of report variations by customizing report criteria using filters
- Save customized report design templates
- Create and run reports on demand and view data
- Schedule recurring reports with dynamic dates
- Export to multiple formats, including Excel, PDF and Word
- Drill down to claim details (PHI user)
- Provide access to report data in PHI and non-PHI versions
- Access transactional data, updated daily (lag of two business days)
- Monitor plan performance
- Identify plan-specific trends and outliers by analyzing multiple years of data (if available)

## Identifying trends and strategies

InfoPort reports provide UMR clients with data to assist in pinpointing emerging trends and utilization when determining alternative plan strategies.

In addition, using report data as a proactive approach assists with identifying potential high-cost claims before they have an impact on overall plan performance.
